

# DAC and Business Crime

Professor Paul Ekblom

MA Innovation Management Course, CSM 2009

Design Against Crime Research Centre

Arts & Humanities  
Research Council

The Grippa research programme, mainly funded by AHRC, is a collaboration between the Design Against Crime Research Centre, Central Saint Martins College of Art & Design, University of the Arts London, and the UCL Jill Dando Institute of Security and Crime Science. Papers and other materials from the programme are at [www.grippaclip.com](http://www.grippaclip.com) and wider practical and research material on preventing bag theft at [www.inthebag.org.uk](http://www.inthebag.org.uk)

# What is Design Against Crime?

DAC uses the tools, processes & products of design to work in partnership with agencies, companies, individuals and communities to

- prevent all kinds of **crime** – including antisocial behaviour, drug abuse/ dealing and terrorism
- promote quality of life & sustainable living through enhanced **community safety**

through designs that are 'fit for purpose' and contextually appropriate in all other respects

**...and DAC can be quirky too**

# Design doesn't have to look criminal

# Scope of Design Against Crime

- Secure products
- Security products
- Security components
- Security features/ furniture
- Secure systems
- Secure information
- Security communication/ art
- Secure clothing
- Secure places/ environments
- Secure communities

**Design is about *processes*, not just products!**

# Inherently secure product ... then

# ...and now - **Vexed Generation/ Puma**

# Remedial design – now it's secure

# **Securing product/ Secure + securing product**

# Securing products

# Security Product

# Security component – Brand Protection

# Security System – Chips Protect High-Value Alpacas

# Security communication – based on research, and evaluated

# Most design follows a *user-centred* approach

# But people abuse the designs!

## So to the user we add the abuser

**Few designers have the right  
mindset for this**

A receptacle  
for grime?

**Wrong  
mindset  
for design:  
failure to  
think thief**

Or a tool  
for crime?

# **Response: The No ClimBIN**

## **Jenny Loqvist**

Competition organisers

Design Out Crime Research Group

Curtin University Australia

[www.designoutcrime.org](http://www.designoutcrime.org)

We've developed  
a dirty mind about  
crime...

But we don't go  
over the top with  
paranoid products 20

**Danger!**

Hence the slogan  
**User-friendly / Abuser unfriendly**

# The challenge of DAC

# Troublesome Tradeoffs

**Can we design secure places & products in-context without jeopardising their main purpose and:**

- Convenience
- Aesthetics/ fear – fortress society
- Legal and ethical norms - privacy and freedom – CCTV?
- Social inclusion
- Sustainable environment
- Safety

# Secure products need not be ugly

**DAC doesn't have to be expensive**

# The challenge of DAC – Offenders *do* fight back – nothing stands still

- Tactical countermoves
  - in situ
  - return better tooled
- Counter-exploitation
- Strategic counter-design
- Reverse

Open to release

Close handles to pull out dents

## Repair car dents quickly and easily!

For minor dents on your bodywork the Dent Puller is the answer with vastly improved suction compared to others on the market. Simply place the cup over the dent, click the handles shut for automatic suction and gently pull out the dent. Open the handles to release the vacuum and remove without damaging the paintwork. No need to pay expensive panel beaters' bills! Can also be used to carry safely sheets of glass, metal, mirrors, etc.

Car Dent Puller Deluxe **£12.99** MX0220

# Arms Race – Safes and Safecrackers

# Meeting the challenge

- We have to innovate faster than offenders
- This requires mobilising designers
- And mobilising businesses that employ them and make the design decisions

# Mobilising designers, design decisionmakers & businesses – the CLAIMED framework

- Clarify crime prevention responsibilities/ roles/ tasks to achieve
  - Intervention
  - Enablers/constraints
- Locate appropriate preventive agents
- Alert them
- Inform them
- Motivate them
- Empower them - increase capacity
- Direct them - objectives, standards

## **Criminogenic products – Who is responsible? Are designers and businesses complicit in crime?**

- Sales – ‘Rip us off legally’ – HMV shop, 1980s – music stored on the shelves sells faster but generates theft
- Loss/ replacement benefits industry...and owner too
- Designed-in obsolescence
- Fashion – *must* get new model, new style
- Leading architect: ‘crime is not the fault of the design, but of the people that use it’
- Crime is a hidden cost or tax – should polluter pay?

# Mobilising for DAC

- Home Office and Design Council – Design & Technology Alliance
- £1.6m 3-year programme to use design to develop new solutions to wide range of crime problems, particularly affecting young people
- Bringing together industry, public sector, designers and crime prevention experts
- Aims to prototype design-led ideas for crime resistant products, public spaces and housing
- Tackling 5 areas:
  - Schools
  - Hot products
  - Housing
  - Alcohol-related crime
  - Business & crime

# Bit more of a challenge...
